

PUBLIC HEALTH

WARNING

**FUTURE SITE OF 5G CELL
TOWER INSTALLATION**

Small cell antennas are a source of *powerful wireless radiation* (4G or 5G) ideal for surveillance, gaming (5G), & AI (5G). 5G requires placement as close as *every 100 feet in front yards*, transmitting nonstop, likely on *light and utility poles*. Research shows chronic wireless exposure can cause cancer, neurological conditions, heart problems, and harm nature!
