

# MA Voters 2024: Sign Initiative Petition A:

## This law limits tech radiation with:

- **Engineering & best practices**
- **Equivalent offline & wired function**

## Wireless Examples:

**All Antennas** - Transmit wirelessly only when needed  
**Cellphones** - Allow incoming calls in 'airplane' mode and full operation in wired modes  
**Smart Appliances** – Work the same with wireless disabled  
**Computer Software** – Work well with wireless disabled

## Electric Examples:

**Powerlines** – Use distance and design to limit field strength  
**Inverters (e.g. Wall Warts)** – Filter non-60 hertz frequencies to protect electrical quality  
**Digital Utility Meters** – Include missing surge protection
